PREFACE TO VOLUME VII.

THIS volume contains the words beginning with the letters O and P. Including the Main words, to which separate articles are allotted, the special Combinations or compounds, explained and illustrated under the Main words, and the Subordinate entries of obsolete and variant forms entered in their alphabetical places, with a reference to the Main words under which they are treated and illustrated, the number of words amounts to 41,667. The Combinations of simple and obvious meaning, of which lists are given under the Main words, without separate explanation, but in most cases with illustrative quotations, number 7,203, raising the actual total of words and compounds recorded in the volume to 48,870.

These words are thus distributed among the letters:

		Main words.	Subordinate words.	Special Combinations.	Obvious Combinations.	Total No. of Words.	No. of Quotations.
O	(386 pages)	7,118	1,198	892	2,173	11,181	38,675
P-Pf	(404 ")	7,208	1,811	1,281	1,470	11,770	41,800
Ph-Py	(836 ")	15,974	3,284	3,001	3,560	25,919	94,675
	Total	30,300	6,293	4,974	7,203	48,870	175,150

Considered as to their status in the language, the Main words are distinguished approximately into those which are native or fully naturalized, and still *current*, those now *obsolete* (marked †), and those considered to be *alien* or imperfectly naturalized (marked ‖), although in the case of both the latter it is often difficult to draw the line. The distribution of the 30,300 Main words is approximately as follows:

	Current.	Obsolete.	Alien.	Total.
O	5,547	1,506	265	7,118
P-Pf	5,477	1,201	530	7,208
Ph-Py	12,302	2,808	1,044	15,974
Total[1]	23,120	5,515	1,845	30,300

Etymologically considered, the O section and the P section of the English vocabulary differ greatly in the proportions of their elements. O is in this respect an ordinary letter, containing a good proportion of words of Anglo-Saxon derivation, beside those of later adoption, from Scandinavian, Old French, Latin, and Greek, and more distant languages. Among the words that go back to Old English use are the prepositions *of* (to the lexicographer the longest and most difficult of English prepositions, the treatment of which in this Dictionary occupies 18 columns), *off*, *on*, *over*, the adverbs *off*, *oft*, *often*, *out*, the conjunction *or*, the numeral and pronoun *one* with its derivatives *once*, *only*, etc., the pronominal words *other*, *our*, *own*, the verbs *ought*, *owe*, *owe*: all of great interest to the student of the historical grammar of the language. There are also numerous well-known substantives, as *oak*, *oakum*, *oar*, *oat*, *oath*, *ooze*, *ordeal*, *oven*, *owl*, and important adjectives as *old* and *open*. To these must be added the words compounded with *out* (1,250, including 773 Main words), and *over* (2,173, including 1,413 Main words). The *out-* and *over*-compounds occupy more than a fourth of O. The words from Latin include the compounds in *ob-* and its phonetic variants, *oc-*, *of-*, *op-*, and important words such as *order* and its family. Among the words from Greek are the numerous compounds in *ortho-*, and the chemical terms related to *oxygen*.

In P, on the other hand, the words that go back to Old English are a very small company. Of the 23,000 Main words here dealt with, about 80 appear in the Anglo-Saxon Dictionary, of which, however,

[1] Adding these to the words in Volumes I-VI, we have for the portion of the alphabet from A to P the following figures:

Main words.	Current.	Obsolete.	Alien.	Subordinate words.	Special Combinations.	Obvious Combinations.	Total.
166,519	146,134	11,197	3,188	40,440	30,139	33,819	264,917

For the letters O and P, the comparative scale of this work and of certain other Dictionaries is shown by the following figures:

	Johnson.	Cassell's Encyclopædic[1].	'Century' Dict.	'Funk's Standard.'	Here
Words recorded	4,465	13,873	15,089	17,097	48,870
Words illustrated by quotations	3,661	8,337	8,308	2,579	38,363
Number of illustrative quotations	11,111	30,841	20,340	3,043	175,150

[1] The quotations in Richardson's Dictionary in O and P are 9,640.

50 were borrowings from Latin, leaving only about 30 really 'native', most of them found in other Germanic languages. Among the chief of these are *pan, path, penny, pith, play, plight, plough, puck, pool, pretty, prick, puff, pull, put.* Of these the two last scarcely appear in Old English, but have since become verbs of great importance; the article PUT is, after GO, the longest as yet in the Dictionary, and has proved one of the most difficult. From causes stated in the article on the letter P, this was the rarest initial consonant in Old English, occupying in Bosworth-Toller's Anglo-Saxon Dictionary only one-fifth of the space of O. But its constant accessions from other languages, and apparently its aptitude to form onomatopoeic words, have made it in the modern dictionary next in compass to S and C, with which it forms a triad of gigantic letters, containing together considerably more than a fourth of all the words in the language. The accessions began with the 50 words from Latin already mentioned, some, like *pile, pit,* and *pound,* of West Germanic age, but most of them only pre-Conquest English, either ecclesiastical, as *pall, pope, priest, prime,* or names of foreign plants and animals, as *parsley, pear, peast, pepper, pea(cock).* The accessions continued with the words from Old French, in origin mostly Latin, and subsequently with words formed directly from Latin (sometimes ultimately from Greek), and also, from the 16th century, in the terminology of philosophy and science, from Greek directly. From the 16th century, words began to crowd in from other European and more distant tongues, until now there are to be found in the P division of this volume representatives of more than 50 languages. To these have been added a considerable number of words of unknown origin, many no doubt onomatopoeias of English or its dialects. The compass of the letter has been greatly enlarged by the words formed with the Latin prefixes *per-, post-, pre-, pro-* (with its OF. form *pur-*), and with the Greek prefixes *para-, peri-, pro-,* and the formatives *pan-, panto-, philo-, poly-, pseudo-, pyro-,* etc. The words in PH are an alien group, representing (with few exceptions) Greek words in Φ, for which Roman spelling substituted PH, and which thus come in between PE- and PI-, at once to swell the P vocabulary and to increase its Greek elements. Of the 23,000 Main words in P, nearly 7,900—more than one-third of the whole,—are of Greek derivation, or are formed with a Greek prefix or first element. This is a proportion much larger than obtains in the language as a whole.

The material collected up to 1885 for O to OM- was arranged chronologically and in part sub-edited by Miss Margaret Haig, of Blairhill, Stirlingshire (now Mrs. Alexander Stuart). The section OO- to OPPRO-BRIUM was skilfully sub-edited by the late Rev. W. J. Löwenberg, of Starkies, Bury, 1887–96, who died in 1899, before seeing any part of O in type. The section OPPUGN to OW- was sub-edited 1895–8 by Mr. James Bartlett, of Cloverlea, Bramley, Guildford, who after more than 20 years' voluntary work at the Dictionary, during which he sub-edited also G, parts of M, R, and S, died on 15 August, 1908. The very technical section from OX to OZ- was arranged and sub-edited by Mr. H. A. Nesbitt, B.A. in 1895. For PA-, the material collected by the Philological Society had, in consequence of the death of the person who undertook its sub-editing, been nearly all lost or destroyed. It had in consequence to be collected anew, which was largely done by the late Mr. E. S. Jackson, M.A., Plymouth; as it accumulated, it was arranged, and finally sub-edited, 1882–7, by the late Miss J. E. A. Brown, of Cirencester. The slips for PE- to PELY- were sub-edited in 1884 by Mr. James Britton, F.L.S.; those for PEM- to PERF- by Mr. R. M'Lintock, of Liverpool, in 1885 and 1893–6; and those for PERS- to PIL- by Mr. W. J. Anderson, then of Markinch, who died in February, 1900. The large section PIM- to PROF- was laboriously sub-edited by Miss J. E. A. Brown, one of the most devoted and enthusiastic of our volunteer helpers, between 1900 and her sudden death on 19 February, 1907. Her work was ably continued, PROFIT to PRY, by the late Mr. C. B. Winchester, in 1907–8. The earlier material for PR- to PU- had been put in order by the late Mr. P. W. Jacob in 1885. The whole section PE- to PHY- was revised, with much new material, 1901–4, by our valued coadjutor the Rev. C. B. Mount, M.A., who also sub-edited, with much original research, the last section PS- to PYXIS in 1904–7. The generous and, in many cases, long-continued services of these voluntary collaborators, so few of whom, alas! survive, call for the fullest and most grateful recognition.

In the revision and improvement of the work in the proof stage, continuous and indefatigable help has been rendered by Misses E. P. and Edith Thompson, of Lansdown, Bath, whose investigations of the sense-history of difficult words, have been most fruitful and valuable; also by the Rev. Canon Fowler, D.C.L., Durham, the Rev. J. B. Johnston, B.D., Falkirk, Mr. A. Caland, of Wageningen, Holland, Monsieur F. J. Amours, Glasgow, and in later parts by Professor F. E. Bumby, Nottingham. Assistance with the proofs has been only a small part of the gratuitous services rendered to the Dictionary by Mr. R. J. Whitwell, B.Litt. Oxon., who has contributed to the history of legal, historical, and other words by special investigations in the Bodleian and Codrington Libraries, the British Museum, and the Public Record Office. Many of our earlier illustrations for such words are the fruit of his researches. Five of our zealous helpers in this department have been removed by death during the preparation of this volume: the Right Hon. Lord Aldenham, who had sub-edited parts of C and K for the Philological Society, and had read our proofs from the beginning, died in September, 1907, Dr. W. Sykes, F.S.A., who supplied

most of our quotations for recent medical terms, died in September, 1906; Mr. E. L. Brandreth, who had sub-edited portions of H, K, and N, besides reading our proofs, and verifying references in the British Museum Library, died in December, 1907; Mr. C. B. Winchester, who, as reader, sub-editor, and, after the death of Mr. Brandreth, collater of quotations in the British Museum, was the most valued of our later volunteer coadjutors, died in December, 1908; Mr. Chichester Hart, of Curraghbligh, Portsalon, Donegal, who added to the proofs many quotations from 16th and 17th century dramatists, died in 1908.

The scholars and men of science who have given their assistance in the present volume include nearly all those who have been named in the Prefaces to volumes V and VI, to whom again grateful thanks are recorded. More especially must mention be made of etymological and philological help rendered by Monsieur Paul Meyer, Membre de l'Institut, Paris, and Professor Eduard Sievers, of Leipzig, both Honorary Fellows of the British Academy. Assistance on points of Etymology and Philology has also been received from Professors Napier, Wright, R. Pagan. *Etymol.* The explanation of L. *pāgānus* in the sense 'non-Christian, heathen', as arising out of that of 'villager, rustic', given by Orosius (a Spaniard) *c* 417, has been shown to be chronologically and historically untenable, for this use of the word goes back to Tertullian *c* 202, when paganism was still the public and dominant religion, and even appears, according to Lanciani, in an epitaph of the 2nd cent. The explanation is now found in the L. use of *pāgānus* as = 'civilian, non-militant', opposed to *miles* 'soldier, one of the army'. The Christians called themselves *milites* 'enrolled soldiers' of Christ, members of his militant church, and applied to non-Christians the term applied by soldiers to all who were 'not enrolled in the army'. Cf. Tertullian *De Corona Militis* xi, 'Apud hanc [Christum] tam miles est paganus fidelis quam paganus est miles infidelis'. See also Gibbon xxi. note.

O.

O (ō), the fifteenth letter of the alphabet in English and other modern languages, and the fourth vowel letter. O was the fourteenth letter in the ancient Roman alphabet, corresponding in form and value to the ancient Greek Ο, derived from the sixteenth letter of the Phœnician and ancient Semitic alphabet, 𐤏, ◇, ⋄. (Heb. ע), called *ayin*, i. e. 'eye'. The latter represented a peculiar articulation or consonant, the "glottal catch" (modern Arabic ع, ʿ), a sound unknown to Greek, to which the symbol was appropriated to the vowel *o* (which the sound of Semitic *ayin* in conjunction with *a* may have somewhat resembled). In early Greek, O was used for both short and long *o*; subsequently a new symbol Ω, ω (*Ō mega*, 'great O'), was added to the alphabet to distinguish long open *ō*; the original O *o* (now known as *O micron*, 'little O') being then restricted to short *o*. From Greek times downward, this letter has regularly represented some variety or varieties of the 'mid-back-round' (or labial) vowel of Bell's Visible Speech scale. On account of its intermediate position, this vowel is (like *a*) liable to considerable variations of quality; and many languages distinguish, as practically different vowels, 'close' (or 'narrow') *o*, and 'open' (or 'wide') *o*; the former tending to approach, and at length to pass into, the still closer vowels *u*, *ŭ*; the latter tending to fall into the still opener *a*, *ă*.

In OE., short *o* and long *ō* were etymologically and phonetically distinct. Short *o* was originally both close and open. Short *close o* was normally derived from an original *u*, as in OE. *ofer* OE, Skr. *ubháu*, GE. *übèr*, Gr. ὑπέρ, Indo-European **upháteri*. Short *open o* normally represented an earlier *a* before a nasal, as in OE. *on*, Goth. *ana*, Gr. ἀνά. This OE. *o* from *a(n)* is often distinguished for etymological purposes as *ǫ*. OE. long *ō* corresponded generally to Com. Teut. long *ō*, in which were combined Indo-European *ō* and *ā*, as in OE. *bōc* book, OTeut. **bōkī*, Doc Gr. φάγος, L. *fāgus*; OE. *flōd*, Goth. *flōdus*, Gr. πλωτός swimming. Long *ō* also arose out of a lengthening of short open *o* from *a(n)*, with *n* absorbed, as in *ōð* tooth, OTeut. **tanþ*, Indo-Eur. **dnt-*; *hōn* to hang, OHG. and Goth. *hāhan* from OTeut. **hanh-*, **hanx-*. Long *ō* was prob. originally both close and open, but in late OE. it must, from its subsequent history, have been close. In unstressed syllables, *o* was the ordinary OE. representative of the obscure vowel (ə); and in this capacity it often varied with *a*, *e*, *u*.

In the Middle English period the distinction between open and close short *o* is no longer discernible; and the vowel was apparently always open *o* before a consonant in the accented syllable. Of long *ō* ME. had two distinct sounds, open and close. Open *ō* was the normal representative (in midland and southern speech) of OE. long *ā* (or lengthened *a*), which passed through the sound of (ɑ:) to that of (ɔ:), being sometimes written in the 13th c. *oa*, but, eventually, simply *o*, or *oo*: thus OE. *mōna*, *wōg*, *stōl* (*stōle*), ME. *moone*, *moon* (mɔ:n), *woon*, *woo*, *stol*. It often represented long *ō* derived from Fr. or L., or arose out of an earlier short *o* in an open syllable, as OE. *hopa*, ME. *hope*. ME. close *ō* represented OE. *ō*. This *ō* must have been a very close sound, for about the end of the ME. or beginning of the mod.Eng. period it passed into the sound of (ū), usually with the spelling *oo*, though sometimes with the simple *o* spelling, as in the words *do*, *to*, *two*. ME. open *ō* either continued into mod.Eng. as *o* (*bone*, *ore*, *hope*), or was, from 16th c., written *oa* (*oath*, *moat*, *coal*); but in usage it became at length close and quasi-diphthongal (ōʊ), except before *r*, where it remains open (ōə). In the 13th c., *o* began to be written in certain cases for *u*, esp. before *m*, *n*, *v* (= *v*), as in *nome*, *sone*, *love* (= *lufve*), OE. *nama*, *sunu*, *lufu*. This, which has largely survived into mod.E., was merely a *graphic*, not a *phonetic*, change.

The normal sound of short *o* is now (ɒ), low-back-round, varying with mid-back-round-wide (ɔ), and low-back-round-wide (ɑ); but it frequently stands for (ʌ), as in *son*, *doth*, or (ə), as in *word*; and in unaccented syllables sinks to (ə), as in *nation*. When original short *o* comes before *r* final, or *r* + consonant, as in *or*, *her*, *corn*, *wort*, it is now lengthened into the corresponding long sound *ō* (ɔ:, ɑ:, ə:, ɑ:). A still more recent lengthening of *o* often takes place in southern English before certain consonants, as in *cross*, *off*, *moth*, *soft*, *wool*, being as yet only partially recognized, is here represented by ɔ.

The normal sound of long *ō*, as in *no*, *toe*, *home*, is the quasi- or imperfect diphthong (ōʊ); but before *r*, as in *bore*, *choral*, *story*, the sound is that of the open quasi-diphthong (ōə). In London and the south of England, this *ō*, esp. when *r* follows in the same syllable, as in *ore*, *worn*, *porter*, is usually identified with the (ɔ:) mentioned above as arising from ME. short *o* before *r*. This is not the case, however, in the educated speech of the country as a whole, nor in America, and the sounds are still separated by most orthoepists (see Ellis, *E. E. Pronunciation*, I. 94-95), and in dictionaries generally; they are distinguished in this dictionary, as in *boarder*, *border* (bō·ədəɹ, bɔ·ədəɹ), *mourn*, *morn* (mōən, mɔən).

Hence, in modern English, the normal sounds of *o* are

1.	*o* in *no*, *bone*	nō, bōn.
2.	*o* „ *one*, *glory*	wʌn, glō·ɹi.
3.	*ō* „ *or*, *north*	ɔ:ɹ, nɔ:θ.
3 a.	*ō* „ *ore*, *mouth*	ɔ:ɹ, mɑ:θ.
4.	*o* „ *on*, *got*	ɒn, gɒt.

Exceptional sounds, due to special causes, and usually spelt otherwise, are

5.	*o* (*u*) in *to do*	tə dū.
6.	*o* „ *one*, *other*	wʌn, ʌðəɹ.
7.	*o* „ *wool*, *worthy*	wʊl, wə·ðĭ.

No. 1 is also represented by *oa*, *oe* (final), *ow*, *ough*, *eau*, *ew*; as in *boat*, *hoe*, *sow*, *low*, *oh*, *beau*.

No. 2, by *oe*, *ou*, *oo*, rarely *ow*; as in *tone*, *prove*, *Groom*, *door*, *flood*. In *brooch*, *oo* has the sound (ō).

The combination *oo* now normally represents long (ū), long (ʊ·), short (ʊ), as in *moon*, *moor*, *good*; exceptionally, it has the sound of 'short *u*' (ʌ), as in *blood*, *flood*, or of 'long *o*' = Nos. 1 and 3 above.

Ou, *ow*, usually represent a true diphthong (ou), as *bout*, *how*; or an imperfect triphthong, as in *Maid* (meəʊd).

Ow, *eow*, also normally represent a diphthong (au), as in *out*, *house*, *now*, or an imperfect triphthong, as in *how* (hauə). But *ow* has also various other sounds, as in *town*, *tow*, through, *yew*; *wool*, *poor*; brought, cough, enough; in unstressed final syllables it is commonly (ə), as in *forever*, *piano*.

In unaccented syllables, all the sounds of *o* are liable to shortening and obscuration, and tend to sink through *o*- or *oo*-, *o* or *u*-, to *ĭ*, *ĕ*, *ŭ*, and (ə), as in *tobacco* (ə, ă, ĭ), *accuracy* (ŭ), *dilatory* (ə), *sulfur* (-ə), *comfort* (ə), *cannot* (ŭ, ə), *parrot* (ə), *notion* (ə), *taxation* (ə).

The change of OE. *o* to *u* in ME. was a characteristic of the northern and midland dialects, and that of Standard English. But the northern dialects retained *o*, the grammar of which formed *sun*, *sone*, *love*, *come* = *sune*, *done*, *more* = *mare*, *done*, *more*, in one of the most distinctive features of northern English and Scotch. In later times this *o* is often written *oo*, or *oe*, and corrupted to *ou*, *o*, or (ŭ, ĭ, ə). The change of OE. *ō* to (ū, ʊ), is also proper to Standard English and the related dialects, the sound having become in Scotch and also in German (and E. or Fr. *eu*) *ui* or *u*. This, like the English (ū, ʊ) sound, is often written *oo*, but more distinctively *u* or *ui*, as in Eng. *good*, *to*, *good*, *goods*, *guide*. The northern dialects also retain the earlier (ō) for English (ou); this is often written in Scotch, as in ME., *oo*, *ow*; but in modern times sometimes *oa*, as in *roa*, *whoat* = *roe*, *wheat*.

The fancy fondness or mockery of the old and rich *o*, that the shape of the letter O represented the rounded form of the mouth in forming the sound, is seen from the history of the letter to be without foundation in fact.

-o-, *suffix of combining forms of words.* On the analogy of Greek combinations (in which the combining stem usually ended in *-o-*, as thematic vowel or its representative, or as an addition to a consonant stem), and their adaptations and imitations in Latin, late and mediæval, like *Iapetigenia*, *Galligenus*, *Galliobritannī*, *Anglicocentrici*, etc., *-o-* has come to be, in modern Latin and in English, the usual connecting vowel in combinations, not namely in ethnic names as *Anglo-Saxon*, *Anglo-Indian*, *Indo-European*, etc., but in scientific terms generally; it is allied, not only to terms of Greek origin, but also to those derived from Latin (Latin compounds of which would have been formed with the L. connecting or reduced thematic vowel, *-i-*, especially when compounds are wanted with a sense that Latin composition, even if possible, would not warrant, but which would be authorized by the principles of Greek composition. Such are *cocaine-*, *common-*, *cyano-*, *delicho-*, *oblongo-*, *onto-*; *chloro-*, *indo-*; *circlo-*, *cuneilo-*; *acapito-*, *pneumo-*; *dramatico-*, *economico-*, *historico-*, *politico-*; *faco-*, *sero-*; etc.

1. The primary and etymological function of a combining form in *-o-* is to qualify adjectivally the adj. to which it is prefixed; as, in Gr., ἀπλόχρως 'wholly green', pale green; mod.L. *ovato-cordatus* 'ovately heart-shaped'; *cordate with ovate modifications*; *Anglo-Norman*, Norman as modified in England. Such a comb. is, as it were, the adj. with adverbial qualification, belonging to a sb. with adj. qualification; thus, as to the qualified sb. *cranky industry* (adj. + sb.) the corresponding qualified adj. is *cranky-industrious* (adv. + adj.); so to *political economy* the corresponding adj. is *politico-economic*. Lord Campbell has used *lego-literary* in the sense 'pertaining to legal literature'.

2. But the use of these forms has been extended, so as to express, as by a kind of abbreviation, almost any manner of relation between the two components. *Anglo-French*, originally 'French of an English sort', 'French as established or spoken in England', is sometimes taken with the common meaning of 'English settled in France', and commonly with that of 'English in alliance, conjunction, or partnership with French'; so *France-Germain many-even mean* 'French combined with German', *Græco-Latin* 'common to Greek and Latin'; *panama-panic*, 'communicating with both lungs and stomach'; *occipito-frontal*, 'reaching from occiput to forehead', or connecting these parts; *occipito-temporo-parietal*, 'including the occipital, temporal, and parietal lobes of the brain'; *graminico-universal*, 'feeding on grass as well as flesh'.

3. This *-o-* is used also, on Greek analogies, in word-formation. From its regular appearance before certain suffixal elements, as *-cracy*, *-graphy*, *-logy*, *-meter*, it tends to be treated practically as a part of these elements; hence, such expressions as 'the *bureau-cracy*, *chef-cracy*, *trade-cracy*, and other *-ocracies*', 'a professor of all the *-ologies*', 'the last new *-ology*', 'galvanometers, lactometers, and other *-ometers* without number'.

Oat differs from other names of cereals, wheat or barley, as *wheat*, *barley* (*bigg*, *beer*), *rye*, *rice*, *maize*, *millet*, and from its own synonym *haver*, in that while these are like *chest*, *wood*, *water*, names of substances or things in the sense, the collective form of which is singular, they having in ordinary language no plural, nor is an individual singular, the collective or mass sense of which has to be expressed by the plural. e. g. "In the crop one or more [= wheat, barley, and oats are raised." Comparing this with *shoes*, *peaches*, *potatoes*, and other names of similar grammatical form, a man in ordered shoe primarily or not was not the plant or its produce in the mass, but denoted an individual grain; of *grass* with its collective pl. *grasses*. This may point to oats being eaten originally in the green state, like wheat and barley, in the form of wheat or flour. But the scanty early evidence is not sufficient to show this.]

Ob., abbrev. of L. *obiit*, died; used before the date of a person's death.

Ob-, *pref.* The Lat. prep. *ob* 'to the direction of, towards, against, in the way of, in front of, in view of, on account of'. In combination with *vbs.* and their derivatives, the *b* is assimilated to certain consonants, becoming *oc-* before *c*, *of-* before *f*, *op-* before *p*, and *opp-* before *o-* (in *annihilate*). In combination it has the following senses: **a.** In the direction of, towards; facing, in front of; so *attentive* to turn towards, *obedire* to listen to. **b.** Against, in opposition, so *accuse* to sue against, *obloquy* to place against; often merely implying the injurious or objectionable character of an action. **c.** Upon or over; down upon, down; so *obfuscate* to draw upon or over, *obligate* to bind down, *occidere* to fall down. **d.** Completely; sometimes pleonastic, so *obsolescere* to sweeten (completely), *obdormire* to harden greatly; often with a colouring of sense 2.

In English use, *ob-* (*oc-*, *of-*, *op-*, *o-*) occurs

1. In combinations already formed in Latin in the senses above-mentioned; merely in words formed in Eng. itself on Latin elements; e.g. **a.** *obedience*, *obsertion*; **b.** *object*, *occur*, *opponent*, *opposite*; **c.** *obface*, *accident*; **d.** *obdurate*, *obsolete*.

2. In mod. scientific Latin, and hence in Eng., in Botany, etc., *ob-* is prefixed to adjs. in the sense 'inversely', or 'in the opposite direction'; e.g. *obcordate* (Linnæus), *obovate*, i.e. cordate with the base or broad end presented; *obovate*, ovate or egg-shaped with the wider end presented; *obtriangular*, triangular with the apex downward. See below Obclavate to Obtuserate.

This is not an ancient L. use, where *ob.* was rarely combined with an adj., the chief example being *obliquus* Cicero), which exactly merely by its sense the model for these words. Apparently the garden suppressed the *ob.* of the adj., *obovate* Gerarde 1597, and is the abridged representative of that word.

(Note. The clause of this verb in the 15th and most of the 16th c. is notable. Against 230 quots. for 16th c., we have for 17th only 6, outside the Bible of 1611 (where it occurs 22 times), and for 18th c. only 11, all of its last 32 years. The verb occurs only twice (negatively) in Shaks.; it actively almost from the Concordances to Milton and Pope, is not used by Gray; cf. Johnson's quots., exx. 4, are from the Bible of 1611. It was again freely used by Cowper (13 instances in Concordance). This evidence appears to have been due to the vulgar employment in sense 8; cf. 1597 Shaks. *2 Hen. 1. The vast body of water on the surface of the globe, which surrounds the land; the main or great sea. (Down to *c* 1682, commonly *ocean sea*; before 1400 also *see ocean*, *sea of ocean* = L. *mare oceanum* (Cæsar *Bell. Gall.* II. vii, Tacitus *Hist.* IV. xiii); OF. *mer oceane*, *oceanne*, *occeanne mer*, where *oceane* was adj. fem. qualifying *mer*; and *ocean* may sometimes have been viewed as an adj. in Eng.)

In early times, when only the one great mass of land, the Eastern hemisphere, with its islands, was known, the ocean was the Great Outer Sea of boundless extent, everywhere surrounding the land, as opposed to the Mediterranean and other inland seas.

2. One of the main areas or regions into which this body of water is divided geographically.

These divisions are partly natural, through the intervention of portions of land, partly arbitrary for geographical convenience. It is usual to reckon five of them, the *Atlantic*, *Pacific*, *Indian*, *Arctic*, and *Antarctic* Oceans, of which the first two are sometimes subdivided into Northern and Southern. But the Pacific, Indian, and Antarctic really form one great ocean, the 'South Sea' (of which the Atlantic and Arctic again form a smaller prolongation), divided from the larger basin only by an imaginary line drawn between the southern points of Africa and America. The upper ocean was formerly given to smaller portions of some of these; the North Sea has still the synonym German Ocean.

Oddfellow, Odd-fellow. [A fanciful appellation: cf. Odd *a.* 9 b.] A member of a society, fraternity, or 'order', organized under this name, with initiatory rites, mystic signs of recognition, and various 'degrees' of dignity and honour, for social and benevolent purposes, especially that of rendering assistance to members in sickness, distress, or other need.

The name 'Odd Fellows' appears to have been originally assumed by local clubs formed in various parts of England during the 18th c. for convivial and social purposes, notably with those of Manchester, Sheffield, and Leeds, which appeared to imitate those of Freemasonry. Associations of Odd clubs were formed from time to time for purposes of mutual recognition: of which that called the 'Independent Order of Oddfellows, Manchester Unity', formed about 1813, has grown into a vast organization, having local branches or 'lodges' throughout Great Britain and the Colonies, as well as in the United States and some Foreign countries. Besides this, there are numerous smaller societies of the name 'Odd Fellows', as the Grand Order of Odd Fellows, a similar federation also extant in the United States, which, beginning in 1819 in connexion with the Manchester Union, organized from it in 1842, and is now a great and important organization.

1811 *Lex. Bal., Odd Fellows*, a convivial society: the foundation to the most noble grand, armorial & royal order, is well worth seeing at the price of becoming a member. 1834 Thomas Walker *Wks.* (1888) 229 Most will...if they only converse, turn out to belong to their dangerous odd-fellow society. 1837 *Pall Mall G.* 2 Sept. 6/1 A grand gathering of Oddfellows was held last evening at the Masons' Hall tavern,...to welcome the grand master of the Manchester Unity. 1881 Statistics of Mem. 6/1 A General Council Meeting of the Scottish Order of Oddfellows' Friendly Society was held on Saturday at the Oddfellows' Hall, Edinburgh.

Hence **Oddfellowship,** the status of an Oddfellow; the principles and organization of the 'Oddfellows'.

1870 *Daily News* 30 June, I am forgetting that some of my readers are, perhaps, unacquainted with the rudiments of Odd-Fellowship. 1883 *Chambers' Encycl.* VII. 566/2 On its institution in Manchester, the main purpose of Oddfellowship was declared by its laws to be, "to render assistance to every brother who may apply, through sickness, distress, or otherwise, if he be well attached to the King and government, and faithful to the Order".

Odds (*ǒdz*), *sb.* Also 6–7 **oddes, ods,** (*S. Sc.* **oddis, odis,** ? **odd's,** *pl.* **oddses**). [app. pl. of Odd *a.* taken subst.: cf. *sense.* In 16th c. regularly, and in 17th and 18th c. usually, construed as a singular, 'the odds *is* or *was*'; an isolated instance of 'the odds *were*' appears in 1614, but this construction is unusual before the 19th c.

It is somewhat difficult to comprehend how the plural of *odd* came to be taken to express the sense 'difference'; and also how a word originally plural should, while still retaining the plural form, have been so commonly viewed and construed as singular. The most likely explanation is that *oddes, odds* first meant 'odd' or 'unequal things' (cf. entry in "pare things or matters"), a relic of which appears to exist in the phrase 'to make odds even', found in the earliest quotation. But the notion of two *odd* or unequal things as especially involving that of the relation between them so easily to pass into that of 'inequality' or 'difference', as it perhaps already did in the phrase in question, and as is fully developed in sense 2. After the sense 'difference' was once established, the plural character of the word might be lost sight of, the more easily that in this sense no singular was in use, nor, from the suggested origin, possible. We may compare the history of *news, means, pence.*]

1. a. In reference to ancient literature (and in some early uses of the word in English): A poem intended or adapted to be sung; e.g. the Odes of Pindar, of Anacreon, of Horace. *Choral Odes*, the songs of the Chorus in a Greek play, etc. **b.** In modern use: A rimed (rarely unrimed) lyric, often in the form of an address; generally dignified or exalted in subject, feeling, and style, but sometimes (in earlier use) simple and familiar (though less so than a *song*).

It rarely extends to 300 lines, and some poems so named are quite short, though rich; the name would not now be given to such. The metre is largely elaborate (especially in 18–19 Dryden, Alexander's Feast, Wordsworth Intimations of Immortality), or consists of stanzas regularly varied (Gray's Pindaric Odes); but, in shorter 'odes', sometimes of uniform stanzas (Gray's shorter odes).

Œ (in the earliest times, and now often, written separately *oe*) was in Early Old English the symbol of the *i*-umlaut of *ā*, *a*, as in *fāt*, *fǽt*, *sacan*, *sæcan*, *sōkte*, *sōhte*, doubtless originally sounded like Ger. *ä*, *e*, but afterwards written (and sounded) simply *ā*, *a*, to which form it passes down into Middle English.

In modern Eng. *œ*, *æ* reproduces the usual L. spelling of Gr. *αι*, which often in med.L., and in Romance, was treated like simple *ē*. In words that have come into Eng. through med.L. or Fr., or other Romance langs., Eng. has usually a simple *e*, as in *economy*, F. *économie*, L. *œconomia*, Gr. *οἰκονομία*; *penal*, F. *pénal*, L. *pœnalis*, f. *pœna*, Gr. *ποινή*; *cemetery*, L. *cœmeterium*, Gr. *κοιμητήριον*; but in recent words derived immediately from L. or Gr., *œ*, *æ* is usually retained, esp. (1) in proper names, as *Œdipus*, *Eneas*, *Phœbe*; (2) in words referring to classical antiquities, as *sestet*, *Phœbe* (in which, however, some represent Gr. *αι* by *ai*, as *aither*); (3) in scientific and technical terms, as *anæmia*, *anæsthesia*, *asteræ*, *dioicous*, *diœcious*, *homœopathy*, *pharmacopœia*, *mesomitosis*; but there is a tendency, stronger in America than in Great Britain, to substitute *e* for *æ* in these words when they pass into popular use or become familiar, e. g. *diarrhea*, *esophagus*, *hemoid*. This *œ*, being only a diphthong and subsequently a long vowel, is usually pronounced as 'long *e*' (*ī*), rarely as 'short *e*' (*ĕ*); when changed to *e*, it submits to the same usages as ordinary *e* from Gr. and L.

In French, *œ* is an occasional etymological or orthographical substitute for *e* in the diphthongs *ei*, *eu*, as in *œil*, *œuf*, *cœur*; when these words are borrowed in Eng. they retain the Fr. spelling. *œ*, as also occasionally represents Ger. *ö*, *ø*, *ǿ* (*Goethe*), and the *ö*, *ø* of Scandinavian tongues (*Faroe*).

Of (*ŏv*, *ŏf*, *əv*), *prep.* Also (3 *Orm.*) *g-3 off* (*ᵻ* *ofte*): 3-6 **o**, *ᵻ-* **o'**: see O *prep.*[2] [OE. *of*, weak or unaccented form of the word whose rare strong form was *æf*, originally *af*, corresp. to OFris. *af*, *of*, *ef*, OS. *af*, MLG. *af* prep. and adv. (MDu. *ave*, *af*, *of*, Du. *af* adv. 'off'), OHG. *aba*, *ab*, MHG. *abe*, *ab-* prep. and adv., Ger. *ab* adv. 'off', 'away', ON. *af*, Goth. *af* prep. and adv.:—OTeut. *abə*, unaccented by-form *ab*; corresp. to Skr. *apa* away from, down from, Gr. ἀπό, L. *ab*.

The form whence the OE. was immediately derived was *æf* (as in OS., ON., and Goth.). Like other prepositional adverbs, this developed two forms, according as it was stressed or unstressed in primitive OE., *æf* and *of*. In historic times the stressed form appeared only in a few nominal compounds (e.g. *æfþunca displeasure*, *æfwyrcend abuser*), while the originally unstressed *of* survived, as inseparable verbal particle and preposition. In OE. this *of* began to be used also as a separable particle or adv. as in *lif of sille*, dat. inf. *of to drinne*, *sie, pette of ic sidde*, imperat. *drif ût of*, pa. t. *he ûteode of*, *ic ordrand, cl. Se he of ofsloh*; and, as the acc. in this position always succeed the verb, this gave rise to a new stressed form. But to the end of the ME. period, and often to nine or later, both unstressed and stressed forms were written *of*. About 1400, the spelling *of* appears casually, and usually (but not always) for the stressed form, to which it gradually came in course of the 16th c. to be appropriated (though *of* was sometimes used even in the 17th c.). This emphatic form was restricted to the adv. and those emphatic senses of the prep. which are akin to or derived from the adv. *the off: get off the table: hands off: hands off the money* &c. while the original spelling of (pronounced *ŏv*, *ŏv*, *əv*), further reduced dialectally, colloquially, and in certain connexions, to *o'* (see O *prep.*[2]), remains for the weak senses of the preposition. Thus *of* and *off* are now really as different words.]

General Significations. The primary sense was *away*, *away from*, a sense now obsolete, except in so far as it is retained under the spelling OFF. All the existing uses of *of* are derivative; many so remote as to retain no trace of the original sense, and so weakened down as to be in themselves the expression of the vaguest and most intangible of relations. The sense-history is exceedingly complicated by causes of the introduction of senses or uses derived from other sources, the mingling of these with the main stream, and the subsequent weakening down, which often renders it difficult to assign a particular modern use to its actual source or sources. From its original sense, *of* was naturally used to the expression of the notions of removal, separation, privation, derivation, origin or source, starting-point, spring of action, cause, agent, instrument, material, and other senses, which involve the notion of taking, coming, arising, or resulting *from*. But, even in OE., this native development was affected by the translational character of the literature, and the employment of *of* to render L. *ab*, *dē*, or *ex*, in constructions where the native idiom would not have used it. Of far greater moment was its employment from the 11th c. as the equivalent of F. *de*, itself of composite origin, since it not merely represented L. *dē* in its various prepositional uses, but had come to be the Common Romanic, and so the French, substitute for the Latin genitive case. Whether *of* might have come independently in Eng. to be a substitute for the genitive is doubtful. In the expression of racial or national origin, we find *of* and the genitive ᵹen, interchangeable already in the 9th c. (in Bede's *Eccl. Hist.* III. xix, Wæs þes wer . . of þam ærlicestan cynne Scotta = *de nobilissimo genere Scottorum*; Ibid. III. xxi, Se ilcana wes Scyttisces cynnes = *eiusdem Scottus*: as was one Scotta cynnes = *de natione Scottorum*); and this might have extended in time to other uses; but the great intrusion of *of* upon the old domain of the genitive, which speedily extended to the supersession of the OE. genitive after adjectives, verbs, and even substantives, was mainly due to the influence of F. *de*. Beside this —the most far-reaching fact in the sense-history of *of*—the same influence is also manifest in numerous phraseological uses, and esp. in the use of *of* = F. *de*, in the construction of many verbs and adjs. Many of these can be clearly distinguished; but, in other cases, the uses derived from F. *de* have so blended with those derived from OE. *of*, giving rise again to later uses related to both, that it would be difficult, if not impossible, to separate the two streams, with their many ramifications. All that can be done here is to exhibit the main uses of the preposition, and to show generally how

far back each of these is exemplified. It has not been attempted to classify or even mention all the vbs. and adjs. which are or have been construed with *of*; examples occur under the chief senses and uses, but the construction of any individual vb. or adj. must be looked for under that word itself, where also will be seen what other prepositions above or have shared the same function with *of*.

24. Between two sbs. in sense-opposition.

a. In the sense 'in the person of; in respect of being, to be, for'. *arch.*

The leading sb. is the former, of the qualification of which the phrase introduced by *of* constitutes a limitation: thus 'he was the greatest traveller of a prince' (i.e. the greatest traveller in the person of a prince, or so far as princes are concerned. The sense often merges on that of the partitive genitive, q.v.

1470–85 Malory *Arthur* xv. 421, He was a right good knight of a yonge man. *Ibid.* xvi. 462, The fayrest lord of a knyght that ever bestrood women. 1599 Hakluyt *Voy.* II. Ellis *Catullus* xlix. 1 Greatest speaker of any born a Roman, Marcus Tullius.

b. In the sense 'in the form of'.

The leading sb. is the latter, to which the prec. sb. with *of* stands as a qualification, equivalent to an adj.: thus 'that fool of a man' = that foolish man, that man who deserves to be called 'fool'; 'that beast of a place' = that beastly place. *a* 1450 *Knt. de la Tour* (1868) 58 There is a lake hotly of a woman. 1599 Nashe *Lenten Stuffe* 32 Some such spirit of an Ironicke it is. 1685 Boyle *Med. x.* ii. 321 Take a strange riddle of a lady. 1687 Evelyn *Mem.* 1 Dec., That monster of a man, Lord Howard of Escrick. 1785 Bickerstaffe *Dr. Last in his Chariot* iv. 29, (I) shrivel'd a Sibyllean, here I found you out! 1849 Thackeray *Pendennis* lii, That scamp of a husband of hers. *Mod.* An angel of a woman. A gem of a poem. A duck of a hat (colloq.).

†**25.** Indicating a person in whom one has, finds, or loses something: = in the person of. *Obs.* (supplied by *in*).

Brooke *Fool of Quality* (1809) II. 292 We shall have a heavy loss of our Head Nod. 1860 Hughes *Tom Br.* IV. 347 A precious reproachful I must have had of her.

b. Of things, as in 'to have a bad time of it'.

Of (*it*) appears only to mean 'consisting of' or 'completed by' the fact or circumstance referred to.

1643 Trapp *Comm. Jos.* xxvii. 2 One Captain had a bloody victory of it. 1650 R. Montagu tr. *Bandello's Hist.* (1654) Misc. Comm. I. 463 Count the Commission has had a troublesome journey of it. 1740 Richardson *Pamela* II. 33 What a fine Time a Parson would have of it, I assure you.

VIII. Indicating the *subject-matter of thought, feeling, or action*, i.e. that about which it is exercised.

26. In sense: Concerning, about, with regard to, in reference to. After verbs, substantives, and adjectives.

a. After intransitive verbs: esp. those of learning, knowing, thinking, and expressing thought, as *hear, read, know, think, dream, judge, tell, relate, write*, and the like. In subject-headings, titles of sheepcots, etc., often without a vb. as 'Of Snakes in Iceland'; here, *of* is now often omitted. To these may be added such as *sp, complain, doubt, dispute*, etc., which are closely akin to IX.

Rare in OE. (which commonly used *be*, or with some vbs. the genitive): but *of* occurs also negat. to tell, and in late OE. after *specan* to speak.

30. In the construction of adjectives. Besides those mentioned under the preceding divisions, many adjs. are construed with *of* and an object; the following are representatives of some of the chief groups: *fruitful, prolific, assistant, redolent; liberal, lavish, prodigal, scant, short, sparing; culpable, blameable, susceptible; worthy, unworthy, guilty, guiltless, innocent; certain, uncertain, confident, diffident, doubtful, sure; aware, conscious, unconscious, ignorant, sensible, insensible; careful, careless, forgetful, heedful, heedless, hopeful, hopeless, mindful, unmindful, reckless, regardless, thoughtless, neglectful, negligent, observant, watchful; ambitious, desirous, eager, envious, enamoured, covetous, fond, greedy, jealous, studious, suspicious; disdainful, indulgent, patient, impatient*; those in *-ble*, as *approbative, communicative, descriptive, distractive, expressive, indicative, productive*; and some in *-ic*, as *characteristic, symbolic*.

Many of these involve a substantive, which may be considered as the subject of the positive relation: e.g. *helpful* of, having heps of, exercise of; having regard of, etc.; others are verbal derivatives, and are closely akin to the objective-genitive group X, e.g. *expressive of* = that expresses.

X. Expressing the relation of the *objective genitive*.

31. After a vbl. sb. in *-ing*.

When the vbl. sb. is preceded by *the* or other determinative word, *of* is still used (x.): otherwise the form in *-ing* is treated as a gerund taking a direct object without *of*: but the form with *of* is still in archaic and dial. use (x.). See *-ing*[1].

Originally partitive, but subseq. used instead of the simple possessive (of the possessor or author) where this would be awkward or ambiguous, or as equivalent to an appositive phrase): e.g. *this son of mine* = *this my son* = *a son of (one's)* = *a son which is (one's)*, *a dog belonging to John*. (All the early examples, and many of the later, are capable of explanation as partitives.)

XIV. In the sense *Belonging to or pertaining to*; expressing possession and its converse: 'the owner of the horse', 'the house of the owner'.

Formerly expressed by the genitive, and still to some extent by the possessive case (with consequition of order). The use of *of* began in OE. with about 971, expressing origin. After the Norman Conquest the example of the French *de*, which had taken the place of the L. genitive, caused the original genitive of *of* in all cases in which OE. had the genitive; the purely possessive sense was the last to be so affected, and it is that to which the genitive or 'possessive' case is still chiefly used. Thus, we say *the King's English*, in preference to *the English of the King*; but *the King of England* in preference to *England's King*, which is not natural or ordinary prose English.

47. Belonging to a place, as a native or resident. This verges in OE. with the sense of origin = 'springing or coming from, belonging by origin to' (properly 13 b; in the 13th c. this passed into the sense 'belonging to as the inhabitants or occupants'; 'living in', and so of things 'situated in or at'.

XVI. In *Locative* and other obsolete uses.

Many former uses of *of* are difficult to class. Some of these arose from employing it as a literal rendering of French *de* (or of L. *de*, *ex*), *ab*, in phrases where English idiom would have required some other preposition; others arose from a confusion with *on*, or erroneous expansion of *a*, *o* = *on* (A *prep.*1, O *prep.*1); or of *be*, *a* for *i* = *in*. Others were app. due to confusion of construction. Whatever may be according to distinguish these, examples are here given in various senses.

Of-, *prefix*1, the prepositional adv. OF, OFF, in comb., corresp. to OS. *af-*, ON. *af-*, Goth. *af-*, OHG. *ab-*; L. *ab-*, Gr. ἀπο-, Skt. *apa-*, forming compounds of different ages.

1. In vbs. and their derivatives of Germanic or OE. age, retained in ME., but now obs. In these the original literal sense 'away, off' seldom survived even in OE.; the compound verb formed by the close union of particle and verb, having usually undergone a modification, extension, or transference of meaning, in which the original sense of the elements, esp. of the particle, was obscured or lost. Examples: *afhealt* to hold from, withhold, *afinke* to put away a charge, deny, *afflitan* to displease, grieve, *afrek* to ask for, get by asking, *afrope* to call for, *afreted* to send for. (*Of-* frequently added to the verbal notion that of 'to do away with, finish off, destroy, kill'; as in *afslay*, *afstang*, *afstead*; of 'to injure, hurt'; as in *afte*, *afeat*, *afsit*; of 'to outdo or overcome'; as in *afride*, *afrun*. Closely allied to this is the sense, in participial adjectives, of 'overcome or exhausted with the action expressed by the vb.'; as in *afsliden*, *afstrigt*, *afswungered*, *afthirst*. Words of this class which came down into ME. will be found in their alphabetical places.

In ME. *of* before a cons. was frequently reduced to *a-*, and thus identified in form with several other prefixes of different origin: see A- *prefix.*, and On- *prefix.*2 and cf. ARCHAIC, ORTHOGRAPHY, ATTAINT, etc.

2. In later combinations of OE. and ME. age, the sense of the two elements remains manifest, the particle being usually = 'off'; the union is much looser, the particle being in vbs. mostly separable, with its position depending on the syntax. It was only in pples., verbal adjs., and abs., that the combination became more or less permanent. In the 16th c. *of-* in this connexion passed imperceptibly into *off-*, which is always the form in later combinations. Hence these naturally attach themselves to OFF- *pref.*, under which see the ME. examples.

Of-, *prefix*2, in ME. sometimes to represent an earlier *a-*. OE. *of-* being often phonetically reduced to *a-*, there arose a confusion between the prefixes, so that original *a-* was sometimes expanded to *of-*. See OFFEAR, OFFRIGHT, OFFSHAME, OFFSHOOT, OFFER, OFFCAST, OFFTAKE (in some of which, however, *of-* may be original).

Of-, *prefix*3, in ME. sometimes varies with *after*, OVER, from which it may be shortened. Cf. OFTO, OFFEAR, OFFTAKE. But this cannot always be distinguished from OF- *prep.*1 in the sense 'outdo or overcome' as in *afride*, *afrun*.

Off (*ɔf*), *adv.*, *prep.*, *adj.*, and *sb.*[1] Forms: 1-7 of, 3 ofe, 6 offe), 5- **off** (*dial.* **aff**). [Originally the same word as OF, as explained under that word; *off* being at first a variant spelling, which was gradually appropriated to the emphatic form, i. e. to the adverb and the prepositional senses closely related to it, while *of* was retained in the unaccented and weakened senses, in which the prep. is usually strongless and sinks to (ɔv). *Off* appears causally from *c* 1400, but *of* and *off* were not completely differentiated till after 1600: cf. A. 3, B. 1.]

In this article are included all examples of the adv., whether spelled (a) in the earlier spelling *of*, or (b) the later *off*; but, of the prep., only those uses for which *off* is now the recognized form; for others see OF.

Off-, *prefix.* The *adv. off* occurs in combination with verbs, ppl. adjs., vbl. sbs., and other sbs. In earlier times, it was written *of*, as explained under Of- *pref.* 2; but each of the ME. compounds so survived into modern Eng. were then written *off*, which is the only form found in recent compounds. In verbs, generally, the combination is very loose (see 1 below); in participles used as adjs. the union is closer, and in vbl. and other sbs. it becomes permanent, though combinations of this kind can be formed at pleasure whenever the sense requires. In a few cases, the combination is so specialized in sense, or otherwise important, as to require treatment as a main word. In verbs, the stress is now usually upon the root; in the other classes (2–4) on *off-*.

1. With verbs. *off-* (ME. *of-*) enters into quasi-combination, chiefly as a separable particle, like Ger. *ab-* in *ab-reisen, ab-schreiben*, etc., in which the particle stands before the vb. only in certain syntactical conditions. In ME. *of* was frequently put before the vb. in the infinitive, as in *of glide, of here*, and in this position (though usually written as a separate word in the MSS.) is often hyphened by modern editors (*of-glide, of-here*); modern prose usage prefers the order *glide off, here off*; but in the poles, the adv. is still sometimes put first, and it then sometimes hyphened to the vb. (as is regularly done in 2). ME. examples are the obsolete *of-cnell, of-quell* (to kill off), *of-, off-drive, of-glide, of-here, of-hurl, of-race* (to pluck or tear off), *of-rive, of-shear, of-shred, of-smite, of-swipe* (to cut off with a sweep of the sword),

of-tear, *of-turn*, *of-twitch*, *of-vaute* (= twist off), *of-warp* (= warp off). Later examples are *off-clap*, *-clip*, *off-chute*, *off-stand*, *off-trench*, etc., but these are exemplified chiefly in the pa. pple., where the hyphen may be regarded as simply syntactical as in 2.

Officinal (*ɒfi·sinăl*), *a.* and *sb.* [ad. med.L. *officīnāl-is*, f. *officīna*: see prec.

Officina, in ancient L. 'a workshop, manufactory, or laboratory', was applied in med.L. also to a storeroom of a monastery in which provisions, medicines, or necessaries of any kind were kept for use; in later use it seems to have been somewhat like *shop*, from a workshop to a sale-shop. Its successor L. *officinālis diversus*, *officinalis*, *officinalis* also in the same sense as *officinus*. As most of herbs and drugs, it is not quite clear whether *officinalis* meant 'of the sort used in the pharmaceutical laboratory', or 'of the sort kept in the shops of herbalists and druggists'; the question never 'need or recognized in pharmacy or medicine', being the same in either case.]

A. *adj.* **1.** Of a herb, plant, drug, etc.: Used in medicine or the arts. Of a medical preparation: Kept in readiness in apothecaries' shops; made according to the recipe prescribed in the pharmacopœia. Of a scientific name: Adopted by the pharmacopœia.

As applied to plants, it answers to the Linnæan specific name *officinalis*, *-e*, given to that species of a genus which has been used in medicine, and known 'in the shops' by the generic name: e. g. *Anchusa*, *Borrago*, *Pulmonaria officinalis*, *Lithospermum*, *Symphytum officinale*, = *Anchusa* of the shops or herbalists, *Consolida Minor*, etc.

To the transferred sense, 'recognized by the pharmacopœia', *officinal* has been recently superseded by *Official* (3 b).

The use of *ogee* as the name of a moulding and curve is exclusively English, and the history of this is not clear; but it seems possible that the 'ogee moulding' was so called by workmen as being the usual moulding employed in ogives or gothic-tibs, in which it is a development of the roll-and-fillet (see PALEY, *Gothic Mouldings* (ed. 1862), 3b. 3b, 28, 32).]

2. *Arch.* and *Joinery.* A moulding consisting of a continuous double curve, convex above and concave below; a cyma reversa.

In cross-section, its outline is a sort of S shape when the moulding (with reference to the solid on which it is worked) is towards the observer's left hand, and like the reversed when towards his right. If the S outline is towards his right, or the reversed shape towards his left, the moulding is termed a hook-ogee, a cyma, or a cyma recta. An inverted hook-ogee (frequently used as a base moulding to a wall or plinth), and an inverted ogee, are such mouldings respectively turned upside down. The double-inverted fall of a plinth is a familiar example of the inverted ogee. The term ogee is sometimes applied to all the above curves indiscriminately.

1. An alphabet of twenty characters used by the ancient British and Irish; the system of writing, or an inscription written, in such characters; also one of the characters themselves.

The characters consist each of a stem line or stroke, or a group of from two to five such parallel strokes, arranged along either side of, or drawn across, a continuous median or guiding line. Thus *b*, *l*, *s*, *n*, *h*, *d*, *t*, *c*, *q* are represented by 1, 2, 3, 4, 5 strokes across the line; *g*, *m*, *ng*, *z*, *r*, by four strokes crossing it obliquely, thus /, //, ///, ////; by short strokes crossing at right angles. In inscriptions, the edge of a squared stone usually serves as the continuous base line.

The alleged instance of 1529 to Hans. *Chron.* is an error. † Ohm (*ōm*). [Ger., = Aar.] An obsolete German liquid measure: equivalent to from 32 to 38 gallons according to the locality.

1832 Lyman *Guide Exp. to Cassinet Attraction*, 8 ounces from Rudesheim on the Rhine...four ounces make Rudesheim the ohm (about 32 gals.).

Ohm [1] (ōm). *Electr.* [From the name of the German physicist Georg Simon Ohm (1787–1854), who determined mathematically the law of the flow of electricity (*Ohm's law*).] The unit of electrical resistance: see quots.

'It was in this country that the term "ohmad" or "ohm", suggested by Sir Charles Bright and Mr. Latimer Clark as the meeting of the British Association in Manchester in 1861, first came into use as the name of a decimal multiple of the absolute unit of resistance convenient for practical purposes. At the Congress of Electricians in Paris in 1881, the Ohm was unanimously adopted as an international standard.' *Nature* 24 Feb. 1882, 388/2.

1872 F. L. Pope *Electr. Tel.* iii. (1876) 23 The Ohm ..is equivalent to about ½ of a mile of galvanized No. 9 iron wire. 1878 Preece & Sivewright *Telegraphy* 9 B is constant...to use a symbol to represent the ohm as we use ° to represent degrees, and ' minutes. The symbol used by us is Ω, the Greek omega. Thus we say that the resistance of a wire between London and Birmingham is 120Ω. 1892 Gisbert *Electric. Terms in Lightning* 7 Mar. Suppl. The Ohm is the resistance of a column of mercury of a constant section of one square millimetre and of a length of 106·3 centimetres, at the temperature of melting ice.

Hence **Ohmad** = OHM; **Ohm-a'meter**, an instrument for measuring electrical current and resistance, a combination of an ammeter and an ohmmeter; **Oh'mic** *a.*, pertaining to or measured by the ohm; **Oh'mmeter**, an instrument for measuring electrical resistance in ohms.

1886 H. M. Paterson *Electr.* 231 This is called the S.A. Unit of resistance (1864, or 25 Ohmad). 1889 *Electr. Rev.* 25 Oct. 411 At present Dr. Fleming and a few others talk of 'ohmic' resistance, to distinguish substance from the relation between the back electromotive force and the current. 1892 'Edgcumbe' *Pioneer* No. 12. 6 Ohmmeters indicate the ratio of the pressure between the ends of a conductor to the current passing through that conductor.

-oid (*oid, oi'id*), *suffix*, *ad.* mod.L. *-oïdes*, Gr. *-ωειδής*, i. e. *-ω-* of *γένος*, element or connective + *-ειδής* 'having the form or likeness of', 'like', f. *εἶδος* form; *cf.* L. *-ēformis*: see -FORM. (A parallel Gr. formative was *-ώδης*: see -ODE.) Examples: *αἱματοειδής* (*αἱματώδης*) 'like blood, of the appearance of blood, hæmatoid'; *ἀνθρωποειδής* 'of human form, manlike, anthropoid'. In other mod. langs., as in Ger. and L., the *o* and *i* make distinct syllables (L. *anthropoïdes*, F. *anthropoïde*, Ger. *anthropoïd*); in Eng. also, some pronounce (*oi'id*) or (*oi'oid*), but the prevalent pronunciation of the suffix (said in many words, as *alkaloid*, *asteroid*, the only one) is with the diphthong (*oi*) as in *void*.

Extensively used in scientific terms, taken from Greek prototypes, or formed on Gr. (rarely L.) words. These are primarily adjs. with the sense 'having the form or nature of, resembling; allied to'; but also (as sometimes in Gr.) sbs., in the sense of 'something having the form or appearance of, resembling; related or allied in structure, but not identical'. The sbs. are esp. numerous in Mathematics, where, in imitation of *rhomboid* (Gr. *ῥομβοειδής* approaching a lozenge (*ῥόμβος*) in shape, a *rhomboid*) and *trapezoid* (Gr. *τραπεζοειδής* having somewhat of the form of a table (*τράπεζα*)), the suffix has been used to form the names of many geometrical figures.

'Examples:—*adj.*: Anat. *adenoid*, *arachnoid*, *arytenoid*, *coracoid*, *hyoid*, *zygoid*, *thyroid*; Zool. *annuloid*, *auditoid*, *cancroid*, *cetoid*, *cichloid*, *cyclostoid*, *hydroid*, *labyrinthoid*, *malacoid*, *simioid*; Bot. *ascoid*, *scandaloid*.

sbs.: Bot. *carpoloid*, *cyclosi*, *cliftonoid*, *hyperboloid*, *rhomboid*, *spheroid*, *trapezoid*; Anim. *asteroid*, *planetoid*; Chem. *albuminoid*, *alkaloid*, *amyloid*, *colloid*, *crystalloid*, *metalloid*, *mineroid*; Bot. *acroid*, *fruitoid*, *rhizoid*; Zool. *anoid*: Min. *anorthoid*.

The word-el. *-oïdia*, *-oïdea*, *-oïdine*, *-oïdei*, *-oïdeus* (Eng. *-oïdeous*), are derivatives of *-oïdēs*, *-oïd*.

-oidal. When the form in *-oid* is a sb., an *adj.* is formed in *-oïdal* (see *-AL*): as *conchoidal*, *cycloidal*, *rhomboidal*, *trapezoidal*; so *alkaloidal*, *asteroidal*, *fucoidal*, etc.

Oidematous, variant of (E)DEMATOUS.

‖ **Oidium** (*oi'dĭŏm*). *Bot.* [mod.L., f. Gr. *ᾠόν* egg + *-ιδιον* dim. suffix.] A former genus of parasitic fungi, comprising species now regarded as the conidial stage of various fungi of the family *Erysiphei*; they cause various diseases of plants, and of the human subject. *spec.* The species *Oïdium Tuckeri* (*Erysiphe Tuckeri*), or the disease of the vine produced by this: grape-mildew.

1837 Bakewell *Cryptog. Bot.* § 311(1.) It has already been shown that these supposed species of oidium are not true moulds, but merely states of different species of erysiphe. 1859 *Times* 20 Sept. 8/3 The late rain has favoured the growth of the grapes which escaped the oïdium and the hail. 1868 *Rep. The oils constitute a very large group of natural substances, of animal, vegetable, or mineral origin. They are divided into three classes: (a) *Fatty* or *Land oils* (see FATTY 6, FIXED 4 *d*), of animal or vegetable origin, which (in common with *fats*) are chemically triglycerides of fatty acids, and produce a permanent greasy stain on paper, etc.; these are subdivided into *drying oils*, which by exposure to air absorb oxygen and harden into varnishes, and *non-drying oils*, which by exposure become and become rancid; they are used as lubricants, as illuminants, in making soap, and for various other purposes. (*b*) *Essential* or *volatile oils* (see ESSENTIAL 2 (b)), chiefly of vegetable (sometimes of animal) origin, which are acrid and limpid, and have the characteristic odoriferous principles of plants, etc.; chemically, they are hydrocarbons, or substances of hydrocarbons with resins, etc.; they are extensively used in medicine and perfumery, and in some cases in the arts. (*c*) *Mineral oils*, which are chemically mixtures of hydrocarbons, and are used chiefly as illuminants.

-ol, *suffix*, used to form chemical terms.

1. The termination of *alcohol*, used to form the names of substances which are alcohols in the wider sense (ALCOHOL 3), or compounds analogous to alcohol ; e. g. *cardinol* (methyl alcohol), *menthol, pinenol, pityrol* (terpene alc.), *glycerol* (glycerin alc.), *phenol* (phenyl or benzene alc.), *naphthol* (naphthyl alcohol), etc. In some cases this systematic nomenclature has not displaced the name which the substance had previously received, e. g. *glycerol* is more commonly known as *glycerin* (or, commercially, *glycerine*).

2. From *phenol*, the ending has been transferred to bodies belonging to the group of *phenols* (which are alcohols), as *anethrenol, anethrol, cresol, cymenol, eugenol, thymol*, and to some other phenol derivatives, as *anethol, creosol, guaiacol, phenetol, phlorol, pyrogallol, veratrol, xylenol*.

3. In some words *-ol* is a deriv. of L. *oleum* oil ; in which case it is more systematically written *-ole* ; e. g. *furfurol, indol, oxindol, pyrrol, terpinol*.

This construction appears first with *of*, which may possibly represent the OE. *fela Cons.* Twentigwinlice gio...or the corresponding Fr. *âgé*, with *de* (see quots. 10–45, 20 Mar.) Oleomargarine (*ōlĭōmɑ'rdjĭrēn*, *-in*). [f. OLEO- b + MARGARINE. Often mispronounced (-mā'rgărēn), as if spelt *-margerine*.]

A fatty substance obtained by extracting the liquid portion from clarified beef fat by pressure, and allowing it to solidify; with the addition of butyrin, or more or less admixture of butter, milk, etc. and sometimes of refined lard, it forms a substitute for natural butter, formerly sold as *butterine*, but now legally called in Great Britain (also in France, Germany, Denmark, etc.) *margarine*.

In U. S., *oleomargarine*, popularly *oleo*, is the recognized name of the commercial product, the expressed fat being distinguished as *oleo-oil*.

The name *oleo-margarine* was applied as early as 1872 by the French chemist Berthelot (1827–1907; *Chim. Org.* II. 241 footnote) to a solid substance obtained in 1858 by Poltzin and Boudet (*Comptes Rendus* VII. 685) from olive oil, which was regarded as a combination of the olein and 'margarine' of Chevreul and Berthelot. (See Mouneyrat.) According to the view then held, olein, 'margarin', and stearin were regarded as the essential constituents of animal fat. At butter, or the fat of milk, consists according to Chevreul entirely of olein and 'margarine', with a small amount of butyrin and allied principles. M. Mège-Mouriès in 1869 experimented on its artificial production by the separation of the olein and 'margarine' from animal fat, with subsequent processes for the addition of butyrin, etc. Hence the name *oleomargarine* for the supposed combination of olein and 'margarine' thus extracted. As further research has shown that neither the 'margarine' of Chevreul, nor the oleo-margarine of Berthelot are definite chemical substances, these names are no longer in chemical use, and 'oleo-margarine' has only a manufacturing or commercial use for the fatty substance from which olein, or (as in U. S.) for the artificial butter (*Oleomargarine*) made from it.

Oliver² (*o*·livəɹ). [Origin uncertain.]

A tilt-hammer having the arm or handle attached to an axis, worked with the foot by a treadle which brings the hammer down, and with a spring which raises it: used esp. in the shaping of nails, bolts, and the like.

Such a contrivance is described in 1680 by Plot *Oxfordsh.* 200 'A large swing... set to an axis of wood, from whence goes a rod of iron fastened to a pallet that reaches not a little beyond the anvil, which being drawn by the fore of the smith ... is returned again by three springs of lasby that clasp the axis the contrary way'. This mention of 'springs of lasby', together with the variant *bellyber* in quot. 1874, has suggested that the origin may be found in *belly*, although the established spelling which evidently goes back to times anterior to being memorized points to the proper name *Oliver*.

1846 Mechanics *Farriery & Shoeing Manuf.* 360 The *Oliver*, or small tilt hammer ... was used when the author first saw it, in making long stout nails, intended for fixing the tires of wheels. 1874 *Eng. On (*ǫn, unstr. ən*), *prep.* Also 1–5 **an**, 2–3 **o**, **a** (see *An prep.*, A *prep.*¹, O *prep.*³); 3 **ane**, Orm. **onn**, 4–5 **oon**, 5 **onne**, 5–6 **one**, **un**, 6 **ene**. [OE. *on*, *an* = OFris. *an*, OS. and ODu. *ana*, *an* (MDu. *ene*, *en*, *ane*, Du. *aan* (dial. *an*), MLG. *ane*, LG. *an*, *aan*), OHG. *ana*, *an* (MHG. *ane*, *en*, Ger. *an*), ON. *á* (Norw., ODa. *aa*, Otw. *å*), Goth. *ana* :—O'Teut. **ana* prep. adv. = Gk. *ἀνά* on, upon, up, Zend *ana* upon, Ossan and Umbrian *an*. The original WGer. *an* was sometimes retained in OE. (see *An prep.*), but the simple stressless form was *on*. Before 1200, unstressed *on* before a cons. was worn down to *o* and *a*, e.g. *o þisse mire* or *this wise*, *a þisse*, *a þise* in Ilk, and in this form often coalesced with the following word as *alike*, *alive*; when the following word began with a vowel, the enclitic form was *on*, as *on-efter*, *on-ende*, *an-hand*, *on-high*. See *A prep.*³, *An prep.*, *O prep.*³ This form *a* (rarely *an*) survives only when its connexion with *on* is no longer felt, and usually in combination, as *ashore*, or in special constructions as *set a going*. The regular prep. and adv. in OE.–16th c. the prep. was often colloquially, and in the dramatists, reduced to *o'*, as in *o' my life* (Shaks.), *o' my conscience* (Shadwell), a form now prevalent in north Eng. dialects: see *Eng. Dial. Dict.*]

General Sense:—The preposition expressing primarily the relation of contact with or proximity to the surface of anything, and so that of being supported or upheld by it; also, from the earliest times expressing motion to or towards such a position; these two senses being (as in the preposition IN) distinguished by the case of the word affected, the former taking, in OE., the dative (purely the instrumental) for earlier locative, the latter the accusative or case of motion towards. But the OE. point of view often differed from the modern, so that the accusative was not seldom used where we should expect the dative, and vice versa. (See Wilking *Syntax Alfreds der Grossen* II. § 784, 801, 821). In ME., the distinction of case disappeared, but *on* continued in both uses, the sense being generally indicated by the accompanying verb (e. g. to *lie on*, to *lay on*), though not infrequently with ambiguity, to remedy which the sense of motion began in the 16th c. to be indicated in case of need by the collocation *on to*, now sometimes written *onto*, after the analogy of *into*.

From the earliest times in the Teutonic langs. this prep. has been used in reference not merely to the upper surface or top of a thing, but to the front or any surface (this being the most Gen. and Dis. use of *an*, *ane*, e.g. *an eir þare* at the door, *an ehe þare* to the door); this was also the use in OE. But here *on* received a notable extension of sense, by being used to include also the notion of 'in', almost to the elimination of the prep. *in* from W. Sax. and the dialects influenced by it. (Cf. In *prep.*) So in Early southern ME., *on* still included the sphere of both 'on' and 'in' (sense 3); but *on* was gradually restored; not, however, without the survival of many traces of the former prevalence of *on*; these also a difficulty, in some of the transferred senses, in determining whether the starting-point was 'on' or 'in'. Eventually, not only was this extension in the direction of 'in' given up, but the language has shown a growing tendency to restrict *on* to the upper or at least the supporting surface, = F. *sur*, so as to correspond in use rather to *auf* than *an* in German; this comes out strongly also in the transf. and fig. senses in which *on* indicates the basis or foundation of action, feeling, etc. In OE., when the upper surface was specially in view, *ofer* was sometimes used; but the notion was usually expressed by the combination *uppan*, *uppon* (= *up* + *on*: cf. ON. *upp á*). When, in course of time, *on* itself came to be more associated with the upper surface, the distinction between *on* and *upon* gradually faded away, and *upon* may now be used instead of *on*, to positions into which no notion of *up* enters (see UPON). These changes in the sense-territory covered at different times by *on* make the historical and logical order of the senses difficult; and the following arrangement is in many respects provisional. Even the primary division into senses implying position and those implying motion or direction is difficult to carry out in the figurative uses, in some of which the point of view has gradually changed since they first arose, so that what was originally felt to express a direction of the mind towards something is now felt as a static attitude or mental state.

On-, *prefix*[1], the prepositional adv. *on* [unstressed form of OE. *on*, *ge*] in combination with vbs. and their derivatives, and sometimes with other sbs. The old nominal compounds had the stressed form, as in OE. *ongilden*, *ongyrwan*, beginning, *onfeld*, *onfylle*, Anvil. The compounds in *on-* belong to the following classes:

1. Old verbal compounds, as *onbidan* to Obbide, *onwindwian* to struggle, Anxious. Such of these as survived the OE. period appear in their alphabetical place under On- or A-.

2. Later verbal compounds or collocations of adv. and verb. In these the union of elements is incomplete, and the adv. may be moved to another position then immediately before the vb., where however it regularly stands in the Inf. and pples., so that these acquire more the character of permanent combinations. Examples are †*on-become*, to befall, happen; †*on-ery*, to cry or call upon; *on-draw*, to draw on; †*on-lace*, to lace on; †*on-look*, to look on; *on-sweep*, to sweep on; †*on-take*, to take on, assume, behave: see Take *v.*

On-, *prefix*[2], the OE. unstressed form of *and-*, *ond-*, against, opposite, in reply, in return (see And *conj.*), corresp. to Gothic *anda-*, *and-*, OS. *and-*, *ant-*, Du. *ant-*, OHG. *ant-*, *ent-*, *int-*; e.g. OS. *andfindan*, OHG. *ant-*, *entfindan*, MHG. *entfinden*, *entfinden*, *entfinden*, Ger. *entfangen*, Du. *ontvangen*, OE. *andlēa*, pa. t. *endlēag*, to receive (*cf. a-wā-*, *gewāfongen* receive); OE. *andgietan* to understand, discern (*cf. a-wā-*, *gewāfod* understanding, intelligence). In ME. this prefix is to form indistinguishable from On-[1]: e.g. *anfine*, *anginne*.

On-, *prefix*[3], the same particle originally as the prec., used with counteracting or undoing force; is early OE. *an-*, is late OE. very generally *an-* [levelled with *ān-* = On-[4]], in ME. usually *an-*, but sometimes *en-*; in mod.Eng. always *an-*. Examples: Goth. *andbindan*, OS. *antbindan*, OHG. *ant-*, *entbintan*, Ger. *entbinden*, OE. *anbindan*, *anbinden*, ME. *an-*, *en-bindan*, to Unbind; OE. *andberan*, *-bindle*, OHG. *antbiutan*, MHG. *entbiuten*, OE. *-bindle*, *-bindle*, ME. *-bindle*, *-bindin*, to Unbind; OS. *antwordan*, OHG. *intwurtan*, MHG. *entwurten*, OE. *-wendan*, *-wendle*, ME. *-wendle*, *-wendin*, to Unwind. See Un-[2].

On-, *prefix*[4], frequent ME. early mod.E., and dial. variant of Un-[1], before *dj-*, *pl-bl-*, *wl-*, and their derivatives, as ME. *andone* for *anelone*:—OE. *anelēne*; ME. *enevyrsyn*:—OE. *anwerrian*. Cf. Goth. *wenvis*, Ofs., OHG., OE. *wenvil*, Du. *zwijger*, *envijl*, ME. *wenvis* (*wenvil*, *wenvile*), Unwise.

Formerly often written separately (see e.g. *Pastor Lect.* No. 1901) but generally hyphened by modern editors. In some modern dialects written separately before *pples.* or *vbl. sbs.* as *on* (or *clad*) in sense 'without', e.g. *on eaten*, *ake used*, *unused*, without there being said, without saying, *on mentin'* without making.

One (*wʌn*), *numeral a., pron.*, etc. Forms: see below. [Com. Teut.: OE. *ān* = OFris. *ēn*, *ên*, OS. *ēn* (N.Du., Du. *een*), OHG. (MHG., Ger.) *ein*, ON. *einn* = *ain-r* (Da. *een*, Sw. *en*), Goth. *ains* (= O'Teut. **ainn-az*)—gen-Teut. **ainaz* = L. *unus* (OL. *oinos*); Olr. *óen*, OSlav. *inŭ*, L. *ūnus* one; cf. Gr. *οἶνος*, *οἴη*, *οἷον*. OE. *ān* became in regular course in south. and midl. dial. *ōn*, exemplified before 1200. By 15th c., *ān*, *ōn*, in s.w. and west, had developed (through *ēn*, *æon*, *aiin*, *eun*, *eon*) as initial *w* (cf. the s.w. *wud*, *wust* = *ask*, *ast*?), which only occasionally appears in the spelling (see A. before), but is now the standard pronunciation. The first orthoepist to refer to it was apparently 1701 : earlier grammarians, down to Cooper 1685, give to *one* the sound that it has in *alone*, *atone*, and *only*; Dyche in 1710 has (*ǫn*) beside (*wʌn*). In the north, *ān* was retained in ME.; but through the narrowing of orig. long *ā* to (*ǫ*, *ō*, *ɔ*, *ɒ*, *o*) *ān* has sunk in dialectal utterance through *ōan*, to *oane*, *oën*, *yon*, *yun*, the development of (*yun*) in the south being the counterpart of that of (*wʌn*) in the south. In OE., *ān* had the full adj. inflexions, definite and indefinite, remains of which persisted in the south to c 1300, and in East still later (see A. 5); but, in north. and midl. Eng., the undefined *ān*, *ōn*, with the definite form *ðan*, *ðon* (OE. *ðone*, *ðæne*), is found in the accus. and dative, as well as the nom. by 1200. Already also, *ān*, *ōn* were reduced before a cons. to *ă*, *ŏ* (*an*), which did not *ōn* out till the 16th c.

In the north the suppression of *ān* and *ā* was more pervasive; as the present day to Sc. the full form *ane*, *ain*, etc., is only used absolutely or in the predicate, as, *can, in the attrib. form before cons. and vowel alike, as ān, an yer; we hae ane*; so in north Eng. dial. with *yn* and *yin*. From the early 16th c. pronounced proclitically without stress, across the 'indefinite article' *An, A.* 9-11. In northern dial. the numeral and article were long without alike, the spoken or emphatic stress distinguishing them; so with s. Sc. both were written *ane*. (See Anes(s'), Ane.)

By reason of less permanent confusion of a preceding *Mak*, the collocation *that ane*, *that one*, *that o*, *that n*, became *the tane*, *the tone*, *the tae*, *the to*. (See Tane.)]
